Crawler Dozer

D65EX/WX/PX-17

ENGINE POWER

164 kW / 219 HP @ 1.950 rpm

OPERATING WEIGHT

D65EX-17: 22.620 kg

D65WX-17: 23.520 kg

D65PX-17: 22.990 kg

Walk-Around

The D65-17 dozer integrates well proven Komatsu technology with a powerful and fuel efficient power train, the revolutionary Sigmadozer® blade and a highly efficient automatic transmission with torque converter lock-up. The new EU Stage IIIB/EPA Tier 4 interim engine platform provides it with increased net horsepower and lowers fuel consumption and emissions. An advanced electronic control system manages airflow rate, fuel injection and combustion parameters to optimize performance and to further reduce emissions. Remarkably efficient both for ripping and for dozing, the D65-17 is a productive and reliable Komatsu dozer that will quickly become a trusted working partner.

High productivity & low fuel consumption

- Unique torque converter with auto lock-up
- Automatic transmission
- Clean, powerful engine
- EU Stage IIIB/EPA Tier 4 interim
- Selectable working modes

Optimized work equipment

- Sigmadozer® blade with hydraulic pitch
- INPAT blade
- Multishank parallelogram ripper
- Komatsu-Topcon machine control systems

D65-17

ENGINE POWER
164 kW / 219 HP @ 1.950 rpm

OPERATING WEIGHT
D65EX-17: 22.620 kg
D65WX-17: 23.520 kg
D65PX-17: 22.990 kg

First-Class Operator Comfort

- Quiet and comfortable cab
- Fully adjustable air suspension seat
- Superior visibility on blade and ripper
- Less noise and vibrations
- Integrated rear view camera system

State of the art controls

- Hydrostatic steering system
- Gearshift preset function
- Easy and precise
- Remote safety lock levers
- Large TFT colour multi monitor

Tough and reliable

- Low-drive "PLUS" undercarriage
- Self-adjusting idler support
- Sturdy, rugged design
- Stable in any configuration (EX/WX/PX)

Monitoring System

High Productivity & Low Fuel Consumption

New Komatsu engine technology

The powerful and fuel-efficient Komatsu SAA6D114E-5 engine in the D65-17 delivers 164 kW/219 HP at 1.950 rpm and is EU Stage IIIB/ EPA Tier 4 interim certified. To maximise power, fuel efficiency and emission compliance, it is turbo charged and features direct fuel injection, air-to-air after cooling and cooled EGR.

Torque converter with auto lock-up

Combined with the automatic transmission, the exclusive Komatsu automatic lock-up torque converter reduces fuel consumption by up to 10% by eliminating unnecessary power loss. When required, the power train control system engages the torque converter, or locks it up to send full engine power directly to the transmission during less torque demanding applications.

Automatic transmission

Set by default, the D65-17's highly efficient transmission automatically matches the best gear mode for all dozing and ripping operations and includes a travel speed preset function to reduce work time and operator's efforts. Thanks to Komatsu's ECMV (Electronic Controlled Modulation Valves), gear changes are smoothly timed to always keep the power transfer at maximum efficiency.

KDPF - Komatsu Diesel Particulate Filter
Komatsu's high efficiency DPf captures more than 90% of particulate matter. It includes a special oxidation catalyst with fuel injection system that can incinerate trapped particulates by either active or passive re-generation with no need to interrupt machine operations.

EGR - Exhaust Gas Recirculation
Cooled EGR is a technology well-proven in current Komatsu engines. The increased capacity of the EGR cooler now ensures very low NOx emissions and a better engine performance.

KVGT - Komatsu Variable Geometry Turbocharger
The KVGT provides optimal air flow to the engine combustion chamber under all speed and load conditions. Exhaust gas is cleaner, fuel economy is improved while machine power and performance are maintained.

CCV - Closed Crankcase Ventilation
Crankcase emissions (blow-by gas) are passed through a CCV filter. The oil mist trapped in the filter is returned back to the crankcase while the filtered gas is returned to the air intake.

HPCR - High-Pressure Common Rail
To achieve complete fuel burn and lower exhaust emissions, the heavy duty High-Pressure Common Rail fuel injection system is computer controlled to deliver a precise quantity of pressurised fuel into the redesigned engine combustion chamber by multiple injections.

Selectable working modes

Working mode can be set to either “Power” for maximum power or to “Economy” for energy saving operations. Combined with a choice between automatic or manual working mode, this lets the operator select the optimum machine power configuration for the work at hand.

Optimized Work Equipment

Sigmodozer® blade (EX/WX)

The middle section of Komatsu's Sigmodozer® blade acts like a V-shaped bucket with aggressive ground penetration. Its lateral blade edges help to push the rolling material continuously towards the centre. Combined with the blade's deep curve this largely increases effective capacity and reduces spillage and fuel consumption. The blade's flat cutting edge and the standard pitch function also offer top grading performance. Overall, the Sigmodozer® blade increases dozing productivity by more than 15% compared to a conventional Semi-U blade.

INPAT blade

Perfectly sized to maximize blade versatility, a new straight INPAT dozer blade with a highly durable box structure is available for all models (EX/WX/PX) and makes the D65-17 a perfect tool for a wide range of applications. A fold-up version of the INPAT blade for the WX and PX machines guarantees a transport width of 3 metres and easy transportation between job-sites.

Multishank parallelogram ripper (EX/WX) (option)

The multishank parallelogram ripper has 3 ripper shanks as standard, but can be easily converted to a giant or two-shank ripper, depending on job conditions. The strong parallelogram design offers straight shank movement, adapted for tough applications.

Komatsu-Topcon machine control systems (option)

Automatic blade movements on a dozer greatly improve dozing productivity and grading accuracy. They also allow operators to work faster and more safely with a reduced workload. Komatsu-Topcon machine control systems are the best way to automate blade movements. Depending on the control system used, blade movement can be monitored or fully automated. As a result, even inexperienced operators work much faster and deliver a high-quality final graded area. All the information from the laser or GPS systems is constantly available on an in-cab display, clearly showing the slope and elevation.

The Sigmodozer® blade offers highest material holding capacity

Up to 15% higher production with the improved Sigmodozer® blade (left), compared to conventional Semi-U blade (right).

Hydraulically adjustable tilt: 870 mm

First-Class Operator Comfort

Quiet and comfortable cab

Operator comfort is essential for safe and productive work. The D65-17 provides a quieter and comfortable cab, the ideal environment to concentrate on the job at hand. The cab's hexagonal design and large tinted glass windows offer excellent panoramic visibility. The high capacity and fully automatic climate control system pressurizes the cab to keep dust out. A high quality sound absorbent lining covers the interior to minimize operator ear noise levels.

Fully adjustable suspension seat and travel control console

A comfortable, heavy-duty and fully adjustable heated air suspension seat is at the centre of the operator's safe and cosy work space. For dozing operations, the seat faces straight forward, with a perfect view of both sides of the blade. For ripping, it can be turned 15° to the right, significantly improving rear visibility and reducing neck strain. The position of the travel control console can also be independently adjusted fore, aft and in height to fit each operator's preference.

Superior visibility on blade and ripper

The redesigned ROPS/FOPS integrated cab and the well-located operator seat give optimal blade visibility to the left and right and make both dozing and grading easy, safe and fast. To further improve safety and ripping efficiency the special shape of the fuel tank gives the operator a clear view of the ripper point and of the dozer's back side.

Less noise and vibrations

The D65-17 cab mounts use a cab damper that provides excellent shock and vibration absorption with its long stroke and exclusive design. Cab damper mounts significantly soften shocks and vibrations that conventional mounting systems are unable to absorb.

Rear view camera system

State of the Art Controls

Hydrostatic steering system

The hydrostatic steering system (HSS) offers fast response and more precise turning. Both tracks are powered without interruption allowing smooth, continuous turns and powerful and productive dozing even on soft ground or on slopes.

Gearshift preset function

To reduce the frequency of gear shifting and for comfortable machine operation, a shift preset mode is provided as standard equipment. The preset switch located on the steering lever reduces repetitive gear shifting by the operator and increases operation efficiency.

Easy and precise

The ergonomic Palm Command Control System (PCCS) provides efficient and comfortable steering. The blade control joystick uses Proportional Pressure Control (PPC) for precise operations, excellent and easy grading jobs - and better productivity. When backing up over shot rock or other rough surfaces, travel speed can be reduced with the "slow reverse" function to improve ride quality and decrease vibrations and fuel consumption.

Remote safety lock levers

For extra operator comfort and convenience, remote safety lock levers were added to engage or release the work equipment and travel shut-off bars.

Large TFT colour multi monitor

A large user-friendly colour monitor with simple and easy to operate switches enables safe, accurate and smooth work. It displays the status of the diesel particle filter and provides other on-hand data to continuously improve productivity and fuel consumption.

Tough and Reliable

Low-drive “PLUS” undercarriage

Komatsu’s new low-drive Parallel Link Undercarriage System (PLUS) is extraordinarily tough, with excellent grading performance and stability. It features PLUS link assemblies, a highly reliable floating bushing concept, substantial track link height, superior oil seals and track guards that maximise undercarriage durability. For easier servicing, the equalizer bar’s centre pin is remotely greased. The segmented sprockets are notched to considerably improve the evacuation of mud and further increase the PLUS undercarriage lifetime.

Sturdy, rugged design

A high-rigidity hull structure main frame improves durability and reduces stress concentration at critical areas. The track frame with a large cross section utilizes pivot shaft mounting for greater reliability. All hydraulic piping is robustly protected by cover and inner route to ensure damage protection from materials.

Stable in any configuration (EX/WX/PX)

For complete stability in any working condition the D65-17 is available in 3 different PLUS undercarriage configurations. On rocky ground, the EX undercarriage, with small-width shoes, ensures maximum contact area between the machine and the ground. The PX version has the widest undercarriage shoes and is ideal for soft surfaces. Finally, the WX machine is perfectly suited for most jobs with medium width undercarriage shoes and the same length of track on ground as an EX model machine.

Self-adjusting idler support

The self-adjusting idler support provides constant and even tension on idler guide plates. It reduces noise levels and vibrations and increases undercarriage life while improving grading performance.

Self-adjusting idler support

Hydraulic lines are embedded into the structures whenever possible

Komatsu PLUS undercarriage: When conventional undercarriages are long gone, the PLUS undercarriage keeps going strong.

Komatsu Wireless Monitoring System

The easy way to higher productivity

KOMTRAX™ is the latest in wireless monitoring technology. It delivers insightful and cost saving information about your fleet and equipment and offers you a wealth of information to facilitate peak machine performance. By creating a tightly integrated web of support it allows pro active and preventive maintenance and helps you to efficiently run a business.

Knowledge

You get quick answers to basic and critical questions about your machines - what they're doing, when they did it, where they're located, how they can be used more efficiently, and when they need to be serviced. Performance data is relayed by satellite from your machine to your computer and to your local Komatsu distributor - who's readily available for expert analysis and feedback.

Convenience

KOMTRAX™ helps to conveniently manage your fleet on the web, wherever you are. Data is analysed and packaged specifically for easy and intuitive viewing in maps, lists, graphs and charts. You can anticipate the type of service and parts your machines could require, or troubleshoot problems before Komatsu technicians arrive on site.

Power

The detailed information that KOMTRAX™ puts at your fingertips 24 hours a day, 7 days a week gives you the power to make better daily and long-term strategic decisions. You can anticipate problems, customize maintenance schedules, minimize downtime and keep your machines where they belong – working on the job site.

Through the web application, a variety of search parameters are available to quickly find information about specific machines based on key factors such as utilization rates, age, various notification messages, and more.

A simple chart shows the machine's fuel consumption and helps you to calculate total costs for a job site and conveniently schedule fuel deliveries.

Easy Maintenance

Centralised service station

Preventative maintenance is essential to ensure the long life of your equipment. Komatsu designed the D65-17 with centralised and conveniently located service points to make necessary inspections and maintenance quick and easy.

Reversible radiator fan

The radiator can be easily cleaned by utilization of the reversible, hydraulically driven cooling fan from a touch on the monitor panel. This cleaning reduces fuel consumption and increases overall machine performance.

Modular power train

All the power train components are enclosed in a sealed module. This eliminates oil spills during mounting and dismounting, and prevents dust and dirt polluting individual components. Servicing is much cleaner, smoother and easier.

Self-diagnostic monitor

Simple warning functions, service interval announcements and key operational functions are displayed on the new centralised monitor panel. At a glance, any operator can select the best options to get the best out of the D65-17. In addition, when required, countermeasures are clearly indicated on the screen to enable the operator or service people to quickly take correct and safe action, and keep the machine free of costly major problems and downtime.

Diesel particulate filter (DPF) cleaning

If needed, the Komatsu DPF system is easy to maintain by simply replacing one complete used cartridge with a new one. A replacement cartridge is made available as Reman exchange module, offering a cost effective solution with minimum downtime.

ENGINE

Model Komatsu SAA6D114E-5
 Type Common rail direct injection, water-cooled, emissionised, turbocharged, after-cooled diesel

Engine power
 at rated engine speed 1.950 rpm
 ISO 14396 164 kW / 219 HP
 ISO 9249 (net engine power) 153 kW / 205 HP

No. of cylinders 6
 Bore x stroke 114 x 144,5 mm
 Displacement 8,85 ltr
 Governor All-speed, electronic

Lubrication system
 Method Gear pump, force lubrication
 Filter Full flow

TORQFLOW TRANSMISSION

Type Komatsu TORQFLOW
 Torque converter 3-element, 1-stage, 2-phase, water-cooled, with automatic lock-up function
 Transmission Planetary gear, multiple-disc clutch, hydraulically actuated, force-lubricated
 Gearshift lock lever and neutral safety switch prevent accidental starts.

MAX. TRAVEL SPEEDS

	Forward	Reverse
1st	3,6 km/h	4,5 km/h
2nd	5,6 km/h	6,7 km/h
3rdL	7,3 km/h	8,7 km/h
3rd	11,3 km/h	13,6 km/h

STEERING SYSTEM

Type Hydrostatic Steering System (HSS)
 Steering control PCCS-lever
 Service brakes Wet, multiple-disc, pedal-controlled, spring-actuated and hydraulically released

Minimum turning radius (counter-rotation)

D65EX-17 with Sigmadozer® blade	1,9 m
D65EX-17 with INPAT blade	2,0 m
D65WX-17 with Sigmadozer® blade	2,1 m
D65WX-17 with INPAT blade	2,0 m
D65PX-17 with straight tilt blade	2,2 m
D65PX-17 with INPAT blade	2,2 m

FINAL DRIVE

Type Spur gear, planetary gear, double-reduction
 Sprocket Segmented sprocket teeth are bolt-on for easy replacement

SERVICE REFILL CAPACITIES

Fuel tank	415 ltr
Radiator	54 ltr
Engine oil	30 ltr
Torque converter, transmission, bevel gear, and steering system	53 ltr
